PROJECTS

E-commerce Website

php, Bootstrap JQuery

March 2024 – Dublin, Ireland

- Developed a responsive e-commerce website with PHP, jQuery, and Bootstrap.
- Designed a dynamic home page, category page, products and tags for product filtering.
- Implemented secure user authentication and a customizable login page.
- Built an intuitive admin panel for product management, order tracking, and user administration.
- Utilized PHP for backend logic, jQuery for dynamic content updates, and Bootstrap for responsive design.

Blog Website

Laravel/livewire/filament/tailwindcss

september 2024 dublin, Ireland

- Developed a multi-language blog website using Laravel, Livewire, Filament, and Jetstream with support for Arabic, French, and English.
- Implemented Livewire components for dynamic, real-time updates without page reloads, enhancing the user interface and interactivity.
- Integrated Filament for a customizable admin panel, enabling content management across multiple languages and easy switching between languages.
- Enabled multi-language support using Laravel's built-in localization system, ensuring content is displayed in Arabic, French, or English based on user preference.
- Followed Laravel's MVC architecture to create a scalable and maintainable blog platform, allowing for seamless future feature expansion.

Restaurant Management System

PHP/Laravel/Bootstrap

May 2024 dublin, Ireland

- User Authentication Role Management
- Menu Management: Admins can easily add, update, or remove menu items, categorize them, and set prices. Dynamic menu display for customers based on categories
- Table Reservation System: Customers can reserve tables online, selecting the number of guests and time slots. Admins can view and manage reservations and avoid double-booking.
- Responsive User-Friendly Interface: Mobile-friendly, responsive UI designed with Bootstrap for smooth user experiences across devices. Easy navigation and intuitive interfaces for customers and restaurant staff
- Admin Dashboard: Centralized control panel for admins to monitor overall restaurant operations, manage users, and generate reports.
